LIST OF PLATES

Note

The plates for sculpture are paired for comparison: the photographs are on the left (A) and the drawings on the right (B), and to the drawings have been added the scale and where necessary the grid, reconstruction and cross-section. The works are numbered according to the system used in the Corpus of Anglo-Saxon Stone Sculpture and the position of the panel is described or numbered from the top in small Roman numerals. If the sculpture is not in the Corpus then a known system is used or the Corpus system applied and this is noted in the text. The sculpture shown is all on cross-shafts unless otherwise noted. The coloured plates are of manuscripts only.
